

Travis Adams

Senior Front End Engineer

tadamsdeveloper@gmail.com | (314) 643-6932 | www.codedbytravis.com

SUMMARY

Senior Front-End Engineer with 6+ years building enterprise-scale applications for major corporations. Expert in Angular and TypeScript, with deep experience in reusable UI component libraries, state management with NgRx, and responsive, accessible web interfaces. Familiar with modern Angular features including Signals, and skilled in collaborating across cross-functional teams to deliver high-quality software solutions. Passionate about creating intuitive, performant, and scalable user experiences.

WORK EXPERIENCE

CXtec

Mar 2024 – April 2025

Software Engineer II

New York (Remote)

- Developed Angular and React interfaces, collaborating with backend teams to integrate .NET APIs.
- Led modernization efforts including the OrderFlow Rebuild project, improving performance and maintainability.
- Built reusable front-end components and implemented responsive, accessible designs for enterprise applications.
- Mentored junior engineers and collaborated closely with product managers and designers to deliver high-quality features.

Meyer Distributing

Jan 2019 – Mar 2024

Front End Developer

Jasper, Indiana

- Built and maintained enterprise web and mobile applications using Angular, TypeScript, and NgRx.
- Designed modular, reusable component libraries to standardize UI across applications.
- Contributed to backend API integration and database-driven features using .NET and SQL Server.
- Led code reviews, guided junior developers, and improved onboarding processes.

Freelance

May 2016 – Dec 2019

Web Developer

Indianapolis, Indiana

- Developed client websites using WordPress, and modern front-end technologies.
- Delivered responsive, performance-optimized interfaces with strong UX focus.

Rapsew

May 2016 – June 2016

Front End Developer Intern

Indiana (Remote)

- Assisted in building responsive web components and testing for cross-browser compatibility.

EDUCATION

Indiana University

May 2017

B.S. Media Arts and Science

Indianapolis, IN

Concentration in Web Development & Informatics

SKILLS & INTERESTS

Frontend: Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind, responsive design, accessibility compliance, Web Components, Angular Signals, NgRx

Architecture & Patterns: Component-driven design, modular systems, micro-frontends, state management

Backend & APIs: REST, Node.js, .NET, API integration, SQL Server, Entity Framework

Tools & Testing: Git, GitHub/GitLab CI/CD, Angular testing frameworks, Figma, Jira

Soft Skills: Mentorship, cross-functional collaboration, agile development, problem-solving, code reviews
